Quality **PEEL** Product.

MODEL NO. **CP 66**

SUITABLE
FOR

CP 66 PETROL START ASSIST.
(CP 99 with 2 hour delay)

This device is designed to petrol start, indicated by Yellow Led in a similar operation to our CP 99.

The CP 66 incorporates several features to assist the installer.

For Example:-

- 1) CP 66 incorporates time delay circuit
i.e. Unit will not petrol start, after initial startup, for approx.
2 hours after ignition has been turned off.
- 2) CP 66 petrol start time can be adjusted by trimpot,
- clockwise less petrol, to petrol start from 0.2 secs to 3.0 secs.
- 3) CP 66 feature a "jump" pin located on right hand side of
terminal block. When in place this enables petrol start time
to be preadjusted, remove pin for 2 hour delay.

WIRING:-

- NEG** - Ground/Earth.
GAS - 12 Volt Gas Power from LPG changeover switch.
PET - 'Splice' into Petrol/injector activation wire.
i.e. Petrol wire from switch or wire to Injector activation Relay.
